The Essex North Shore School Counseling faculty provide comprehensive, school-based services to all students with the goal of nurturing skills for students' success during high school and beyond. Freshman students are assigned to a Grade 9 freshman counselor who assists them with their transition to a regional, career technical high school. Grade 9 counselors also work closely with Grade 9 students to assess their career interests in preparation for participation in the Grade 9 Exploratory Program and the ensuing career technical program placement. These freshman counselors continue to work with students throughout their ninth-grade experience. Beginning in Grade 10 and through Grade 12, students are assigned to an Academy-specific School Counselor consistent with their career technical/agricultural program.

At all grade levels, students participate in academic and career guidance lessons delivered by school counselors throughout each year and students graduate having developed a Four-Year Career Plan with the support of the school counselors. Students and their families may access information in their respective student's Career Plan and explore career and college opportunities on their student's *Naviance/Family Connections* account ([link below](#)).

All students have access to supportive interventions from school counselors and school adjustment counselors ([contact information below](#)) to address their developmental, social, and emotional needs. Collaboration with caregivers is also an essential component of our guidance model. Caregivers are encouraged to contact their student's counselor as circumstances arise. Appointments with school counselors and school adjustment counselors are welcome and can be scheduled by emailing or calling the counselor directly ([contact information below](#)).

Parent & Caregiver Sessions

The School Counseling Department sponsors the following parent information sessions annually:

Special Education

- ENSATS students with disabilities are fully included in the life of the school. The academic and CTAE settings offer inclusion support, related services, accommodations and modifications to support all learners in the Least Restrictive Environment.
- Special Educators and Related Service Providers provide specially designed instruction to support students ability to fully access their education and work to develop skills and strategies to become successful and independent learners.
- The IEP Process supports students in creating a plan that outlines the student vision and what they require to access their education as it relates to their area of disability(ies).
- All students have the right to Child Find *“The Individuals with Disabilities Education Act (IDEA) and Massachusetts law require public schools to proactively identify, locate, and evaluate all children ages three through twenty-one who are suspected of having a disability, including children who are highly mobile or homeless, English learners, students attending non-public schools, and preschool children. In this guide, “disability” is used as defined in Massachusetts special education regulations.”*
